Lab 4 – Web Form
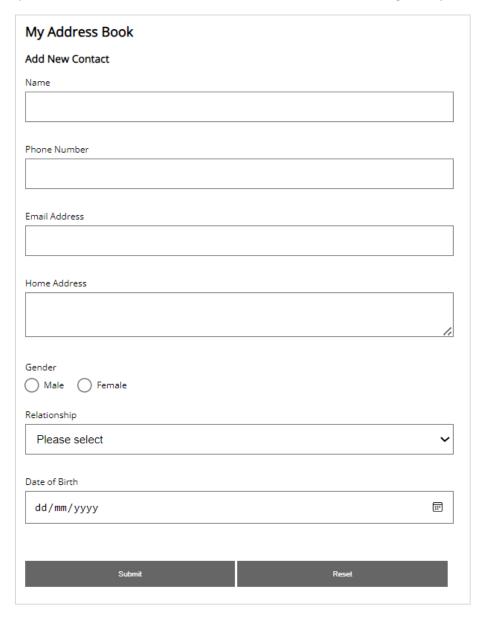

1. Create the following web form by using the appropriate HTML input controls and make all the fields required, so that the user cannot submit the form without entering the input.

2. For input elements of type text, password, date, email, and tel, as well as textarea and select elements, set the following properties:
   a. width is 100%
   b. padding is 15 pixel
   c. margin top 5 pixel and bottom 22 pixel
   d. display as inline-block
   e. font size is 15 point

3. Style all text fields so that the background color is green for valid entry and red for invalid entry.
